

What is ENABLE.EU?

What drives the energy choices we make? What motivates individuals, organisations, and countries to adopt more sustainable energy behaviours?

ENABLE.EU embraces a bottom-up approach to changing energy behaviour: empowering consumers and citizens to make freer and better-informed energy choices - choices that reflect what they truly want.

TRANSPORTATION

moving towards
pollution-free mobility

HEATING & COOLING

comfort that is more
efficient and sustainable

ELECTRICITY

using power in a way
that is smarter and less
CO2-intensive
