

Learning from experience and involving energy-citizens; two ways of improving energy-related policymaking

Thursday 7th June 2018, 14:00-15:30, **Location tbc**

14:00-14:05	<p>▶ Opening</p> <p>Welcome of the participants, and introduction to the session by the session organisers Izaskun Jimenez Iturriza and Gregor Thenius</p>
14:05 - 14:35	<p>▶ Learning from experience: how to make energy efficiency policies stronger?</p> <p>Measuring successes in energy efficiency policies – indicators and policy evaluation Didier Bosseboeuf, ADEME Wolfgang Eichhammer, Fraunhofer ISI</p> <p>The multiple benefits of energy efficiency policies Johannes Thema, Wuppertal Institute</p> <p>How to better design energy efficiency policies including concrete examples about how evaluations helped to improve or reinforce energy efficiency policies Gregor Thenius, Austrian Energy Agency</p>
14:35 - 15:05	<p>▶ From consumers to energy-citizens: involving Europeans in the energy transition.</p> <p>▶ Main factors that drive energy-related choices</p> <p>Energy collectives and the factors that determine their energy-related choices – Key messages for policy-makers Christian Klöckner, ECHOES project</p> <p>Social and cultural drivers of energy choices: Enable Europeans to become active energy citizens Thomas Pellerin-Carlin, ENABLE.EU project</p> <p>Moving towards Sufficiency: designing Living Labs to advance energy sufficiency practices Frances Fahy, ENERGISE project</p> <p>▶ Energy communities and energy citizen experiences</p> <p>Dialogues on Power: Energy Citizen Experiences at the Interface of the Energy Transition Niall Dunphy, ENTRUST project</p> <p>Energy Efficiency in Energy Communities - value-adding activities for a transition for all Europeans Siward Zomer, REScoop PLUS project</p>
15:05-15:25	<p>▶ Debate with the audience</p> <p>Moderated by Robert Goodchild (INEA)</p>
15:25 - 15:30	<p>▶ Conclusion and closing statements</p> <p>Session organisers Izaskun Jimenez Iturriza and Gregor Thenius</p>

Debate

For the debate the organisers will prepare a set of key questions in order to trigger discussions and receiving feedback which will enrich the projects presented with valuable inputs for their further activities. Examples for these questions are:

- what is critical to make energy efficiency policies stronger?
- how can the analysis of results (including multiple benefits) in previous years help revising policies for future years?
- how can policy-makers facilitate the integration of the needs of citizens and communities in the energy transition?

Target group

The target group for this event are experts in energy efficiency policies from the European Commission, Members of the European Parliaments (or their advisors), from energy ministries or national or regional agencies, city representatives, from companies involved in energy efficiency markets, NGOs, researchers, consultants, and any stakeholders interested in energy efficiency policies, achievement of the 2020 and 2030 targets and implementation of the Clean Energy Package.
