Enabling the Energy Union

ENABLE.EU Transition Visioning Workshop

14.06.18 – 15.06.18 | Sofia

Giovanna Giuffrè, ISINNOVA

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement number 727524.

Looking back at the past 20/30 years:

- what has changed YOUR energy consumption behaviour the most?
 - what has influenced the energy consumption behaviour in your region/country?
-
- Write two post-it - the change/year (5')
 - Discuss on your table (20')
 - Report in plenary (5' per table)

*A set of strategic tools that support governmental and industry decisions with **adequate lead time** for societal preparation and strategic response*

- Anticipates multiple, plausible futures (Vs Forecast)
- 5 – 25 years horizon (Vs planning)

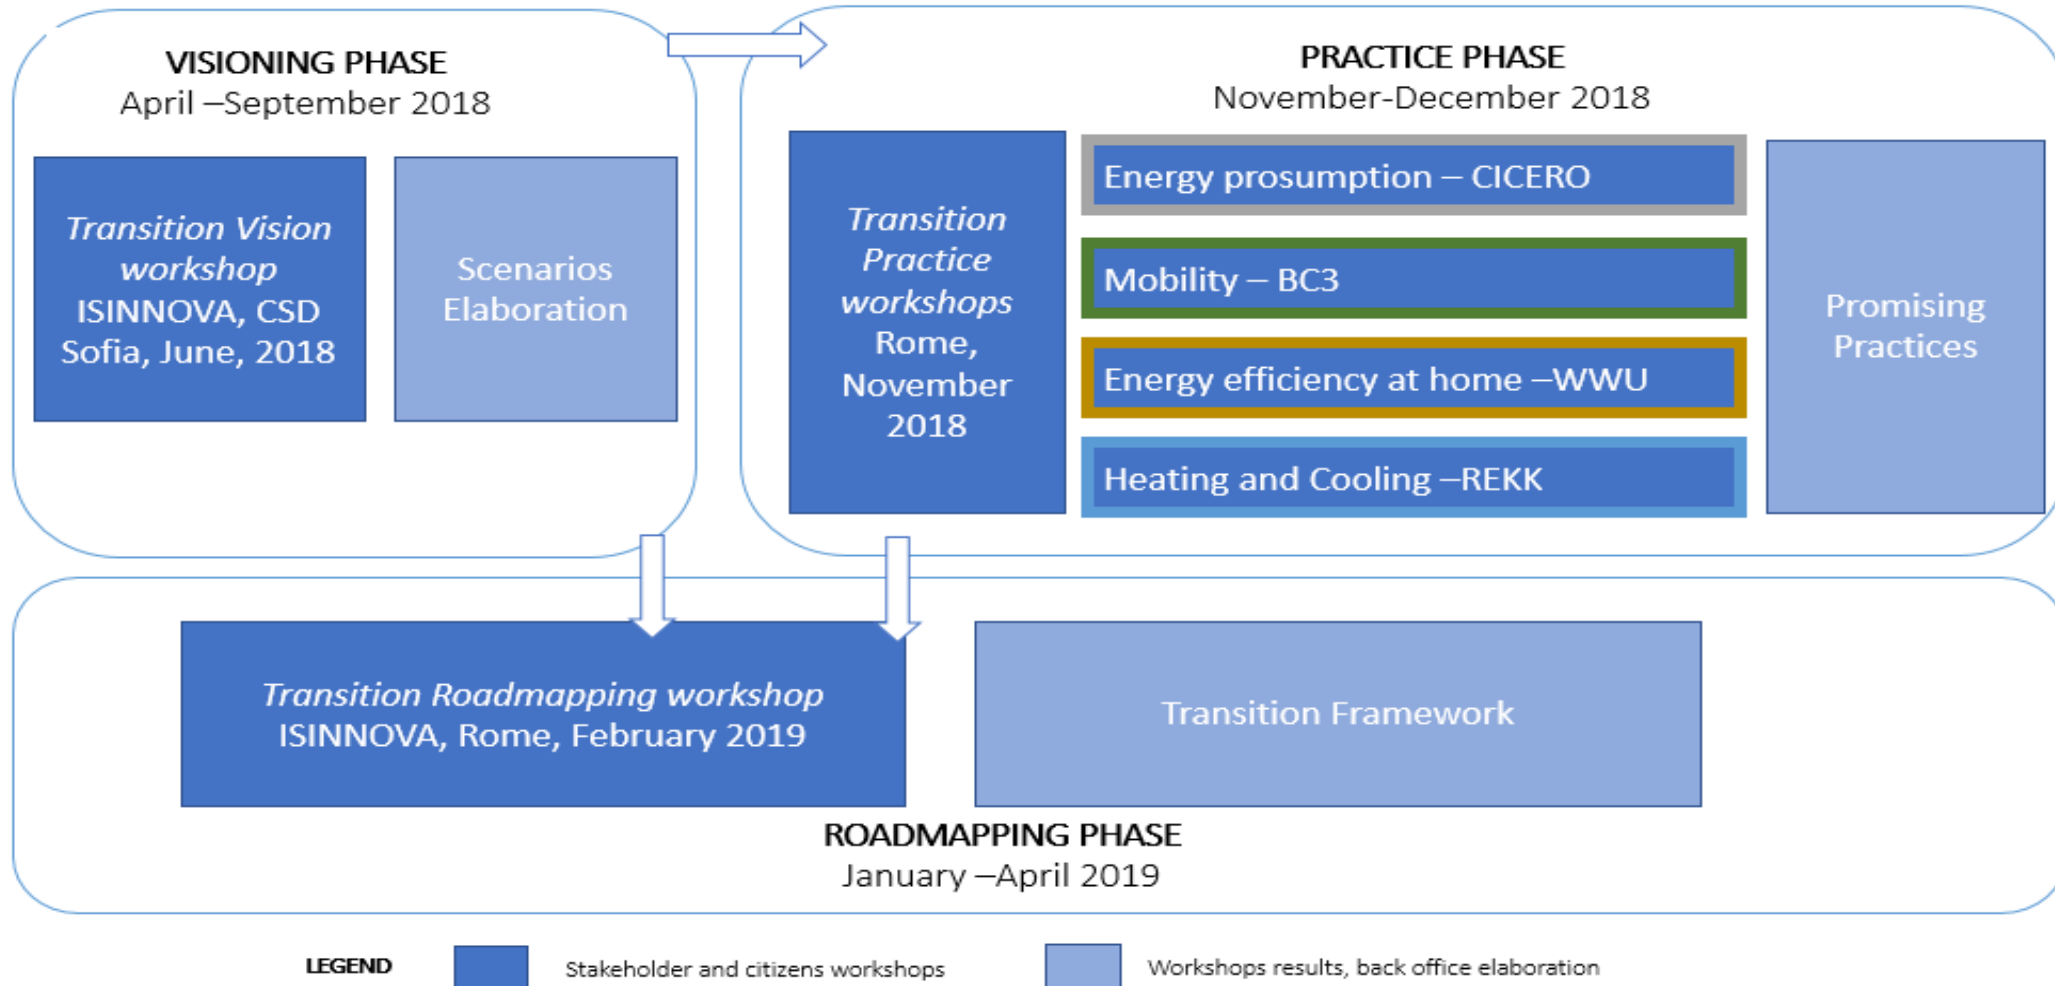

Transition Visioning Workshop: What foresight activities are for..

- to explore **alternatives** in the face of uncertainty
- to **uncover assumptions** (mental maps) and discuss them
- to share **understanding and concerns**
- to illuminate potential problems and future **opportunities**
- to help **identify choices and policy options**

What ENABLE.EU Participatory foresight activities are for..

- 1) Engage key stakeholders and selected groups of households in a participatory foresight process, aiming to **devise trends (e.g. lifestyle and attitude changes) and instrument/policies enabling the transition to low carbon energy system in Europe.**
- 2) To deliver **visions and insights** useful to factor in assumptions about energy-related behavioural change and enabling policies in the **modelling-based Energy Union scenario building exercises (CE)**
- 3) To **deliver evidence useful to formulate policy recommendations (JDI)**

ENABLE.EU Participatory foresight activities

Thank you
